

ABOUT US

One Agro Indonesia is a Strategic Business Unit (SBU) from PT Amerta Berkah Nusantara and specializes in the production and distribution of high-quality coco peat products for various agricultural and horticultural applications.

in supporting waste treatment, especially for agricultural wastes. Our mission is to provide eco-friendly and sustainable solutions to growers, gardeners and farmers worldwide through our product which is coco peat.

Our core strength is understanding the needs of our customers and providing them with a solution for their coir requirements. With several production plants in West Java, Indonesia, we are prepared to supply high-volume customers without sacrificing quality.

VISION

To Becomes a global leader and an innovator in delivering 100% sustainable agricultural products that surpasses the quality standards of our customers and stay competitive in cost

MISSION

One Agro Indonesia is always Supporting and adopting sustainable methods with eco-friendly products that meet the needs of the present

Our Product

Coco peat, also known as coir pith, is a byproduct of coconut husks that are processed for coconut fiber.

It is a natural, organic, and renewable resource that is widely used in horticulture and agriculture as a soil amendment and a growing medium.

Coco peat is a spongy, light brown material that is composed of the fibers and particles that remain after the coir fibers have been extracted from the coconut husks.

Customer Segments

AGRICULTURAL

Coco peat is an eco-friendly and versatile growing medium that offers a sustainable alternative to soil and moss peat. Our high-quality products improve soil efficiency and reduce root diseases, making it a reliable choice for horticulture.

Coco peat is suitable for various sectors, including Arboriculture, Olericulture, Floriculture, Pomology, and Viticulture, delivering excellent results for healthy plant growth.

LIVESTOCK BEDDING

In general, livestock bedding must be clean, comfortable and absorbent. Coco peat makes excellent animal bedding. It is clean, comfortable, highly absorbent, and promotes animal health. It's cost-effective and is easily disposable as Coir Compost for soil.

Using Coco peat for bedding also helps to prevent the production of bad odors and reduces the reproduction of flies and mosquitoes by up to 90%.

Our Packaging

COMPRESSED BLOCK

Packaging Type	: Block
Weight	: 5 Kg or As Requested
Moisture	: 15%
Impurity	: < 2%
Fiber Content	: < 2%
Shive Size	: 3 mm or As Requested
Expansion	: 70 - 80 Liter
Dimension	: 30 x 30 x 12/15 cm
Drying	: Sun Drying
Load Ability / 40HC	: 22 - 24 Tons

Our Packaging

BALE POLYBAG

Packaging Type	: LDPE Polybag
Weight	: 30 Kg or As Requested
Moisture	: 35% - 45%
Impurity	: < 2%
Fiber Content	: < 2%
Shive Size	: 3 mm or As Requested
Expansion	: 150 - 200 Liter
Dimension	: 30 x 40 x 70 cm
Drying	: Sun Drying
Load Ability / 40HC	: 22.5 Tons / 750 Bags

Our Packaging

BALE JUMBO BAG

Packaging Type	: PP Jumbo Bag
Weight	: As Requested
Moisture	: As Requested
Impurity	: < 2%
Fiber Content	: < 2%
Shive Size	: 3 mm or As Requested
Drying	: Sun Drying

How Coco Peat is Made ?

Coconut Husk Procurement

One Agro Indonesia's production process starts with the procurement of coconut husks.

Washing / Aging

The top graded coco pith is left in a clean weed free. The coconut husk is also washed with fresh water to bring the pH and Electric Conductivity to desired level.

Extraction

During this process, we extract the fiber and pith from coconut husk. The fiber will be processed become coir products in another process. Then the pith will be sent for final aging process.

Final Aging

In this step, we are letting the cocopeat in outside and let the monsoon rain washed off the excess salts from the coco pith and make the coco pith pH neutral.

Drying

Once the pith reached the preferred level of EC and pH. It will be brought to drying process with sunshine

Sieving & Screening

After it is already dry, the peat will be brought for sieving & Screening. During this process, the fiber chunks and other impurities are removed. Then peat will be sieved with required size

Packing

The screened and dried coco peat will be compressed to 5 kg each block.

Packing

The screened and dried coco peat will be compressed to 30 - 32 kg each polybag.
